

Presenting the Novitell Fusion

Introduction

Novitell is introducing the Novitell Fusion. A mobile VoIP solution tailor-made to help Internet telephony (IP) service providers transfer their superior fixed line offer to mobile phones. It is a Fixed Mobile Convergence (FMC) solution comprising a wealth of features including a seamless handover between any network including Wifi and GSM and an integration into the mobiles user interface providing a plug and go feeling for the enterprise user.

Enterprise benefits

By purchasing the Novitell fusion the enterprise will experience cost reductions on their mobile expenses in exchange for more mobile, more flexible and far more effective employees. By integrating mobile phones into the core telephony infrastructure they also have the opportunity to streamline, monitor and manage the companies phone usage and to a larger extent integrate mobility with the companies' business strategy.

Service provider benefits

By implementing the Novitell Fusion the ITSP gets a mobile VoIP solution that will allow them to transfer their fixed line offer to the mobile. There is no large initial purchase, but a small investment in the Novitell Fusion software and a possibility to let capacity grow along with the success of the solution. Once implemented the Novitell Fusion will help the ITSP generate additional revenue streams, attract new customers and reduce churn.
